Web and app servers	Team Foundation Server
Scripting language	JavaScript
Operating system	Windows 7, 8
IDE	Visual Studio

Employment History:

Name of the Company	Designation	From	To	Duration (Years)
HCL Technologies Ltd.	Software Engineer	Nov 2014	Till date	2 Years 11 months

Project Profile:

Project 1:

Project title	EMPIRE
Client	Common wealth Bank of Australia (CBA)
Team size	6
Technologies used	C#.Net, PL/SQL
Description	Empire is an internally written standalone

	<p>application that manages a number of loan and deposit products within the premium banking space. It was ostensibly written to support margin lending products. Empire margin lending supports all aspects of applying and managing the loans/deposit accounts including charging interest and fees, producing statements, managing the margin call processes, reporting and data extracts etc. The jobs that are all running in Empire are Oracle scheduled jobs. The client application of Empire is developed with the help of VB 6.0 forms and C# .Net code. All the database (Oracle) requests from client application of Empire goes to the server application of Empire, called middle tier code and it is the responsibility of the middle tier code to convert the database request in XML format and interact with Oracle to get the response back in the form of XML and again convert it to pass back to the client application of Empire, SQL server database.</p>
Role	Developer
Responsibilities	<ul style="list-style-type: none"> ➤ Played the role of SME with focus on quality and on time delivery of development team. ➤ Identifying, investigating, and analyzing business processes, procedures and work practices. ➤ Developing the UI and coding the business components. ➤ Bug fixing during the SIT and UAT.

Project 2:

Project title	CLS (Contingency Liability System)
Client	Common wealth Bank of Australia (CBA)
Team size	4
Technologies used	ASP.Net, C#.Net, WCF, JQuery, MS-SQL
Description	Primarily the contingent liability system used to book the corporate liabilities (for example Bank Guarantee). If a new business house wants to establish a unit, they need electricity supply. The

	NSW electricity board will request the company to provide a bank guarantee of \$5000 (in case of default by the company, the electricity board will invoke the guarantee and claim the amount from the bank). This event may or may not occur and hence it is booked as a contingent liability by the bank.
