Technical Skill:

Programming language	C#. Net, VB.Net
Web technology	ASP.Net, MVC, ADO.Net, Web API, HTML
Technology	AJAX
Scripting language	Java script, JQuery
.NET framework	Microsoft.Net 4.0, 4.5
IDE	Visual Studio 2013/2015
Data access technology	Ado.net
DBMS	SQL server 2012/2014

Operating systems	Windows 7, Windows 10
Roles	Software development, maintenance and technical support, analysis, preparing design documents, testing, deployment, client interaction. Followed SDLC
Version control tool	TFS

Work History –Project Details:

Project – 1	
Project Name	Solution Wizard – Offshore
Duration	Aug 2016 till date
Client	Accenture Solutions Pvt. Ltd.
Brief	<p>Solution Wizard is an internal web-based application used by solution architects to plan and maintain the Accenture bid project details like client details, offshore/onshore countries and resource allocation level wise provide pricing and cost related data etc.</p> <p>SPM, SCM, ADL, MMP, Desktop Application are the Five major modules.</p>
Technology	C#.Net, MVC 5.0, Entity Framework, AJAX, Window Service, Window forms, LINQ, Web API, JQuery, SQL Server 2014
Team Size	7
Role	Application Development Analyst
Key Responsibilities and Achievements	<ul style="list-style-type: none"> Involved in the design, coding and implementation of the web application. Ensure completion of work as per the time and quality parameters specified by the client. Fixed defects, made modifications accordingly and test the modules as per the requirements. Coding as per the requirement & additional changes in the application. Checking application for the normal functionality & bugs. Code maintenance & unit testing. Responsible for deploying the window service on system-testing. BAFO scenarios implementation for MRDB data refresh. Generated ADL (by using window service) and MRDB data template for downloading purpose & desktop windows form application implemented.

Project – 2	
Project Name	Cricket Australia – Offshore
Duration	Oct 2015- June 2016
Client	Australia Cricket Board, Australia
Brief	Cricket Australia is a web-based application used to check the cricket scores, upcoming cricket match details etc. online.
Technology	C#.Net, MVC
Team Size	10
Role	Application Development Analyst
Key Responsibilities and Achievements	<ul style="list-style-type: none"> • Ensure completion of work as per the time and quality parameters specified by the client. • Fixed defects, made modifications accordingly and test the modules as per the requirements. • Coding as per the requirement & additional changes in the application. • Checking application for the normal functionality & bugs. • Code maintenance & performed unit testing.

Project – 3	
Project Name	E-Care (Health Care Management System)
Duration	Jan 2015 to Sep 2015.
Client	Alliance Healthcare Foundation.
Brief	E-Care provides support to doctor, patient, management and other stake holders with the required information to carry out their day-to-day work. HMS is complete solution for recording and retrieving all possible transactions in a hospital & provide complete solution to patient for getting appointment from a doctor, register to hospital and getting treatment.
Technology	VB.Net 4.0, ASP.NET, Telerik, WCF, AJAX, LINQ, XML, SQL Server 2008
Team Size	8
Role	Application Developer

Key Responsibilities and Achievements	<ul style="list-style-type: none">• Understanding the basic requirements.• Designing application to meet the requirements.• Developed front-end web pages using ASP.Net MVC mode & used ASP.Net MVC server side controls for data annotations.• Involved in employee, administration, medical expertise (doctor), nurse, MEDAPP-lab, radiological system info.• Designed, developed and deployed application.• Unit and integration testing.
